

Seed Dispersal - Investigating how Sycamore seeds are spread

Cut out the models of Sycamore seeds below. Fold along the dotted lines to make a helicopter.

Investigating Seed dispersal

Method

Make your model sycamore seed

Attach a paperclip to the bottom

Drop the seed and time how long it takes to hit the floor.

Repeat twice and record your results in a table. Remember to drop it from the same height each time

Add another paperclip and repeat steps 2 - 4. Do this until you have added a total of 5 paper clips.

Number of paperclips	Time to fall (s)			
	1	2	3	Average
