

The Rainforest

Rainforests are full of different animals, insects and plants. What would it be like to stand in the middle of a rainforest? What do you think the rainforest would sound like? A howl from one single howler monkey can be heard for 3 miles! Can you imagine how noisy it would be with that, as well as all the other insects and animals?

Look at these images.
What can you see?

Now use your imagination and transport yourself to the middle of a rainforest. Use what you know about rainforest to think about what you would hear, see, smell, feel and taste Write your ideas below. You could even use your ideas to write your own rainforest sense poem.
