

Recycling Research

Have a look in your recycling bin and choose items made of plastic, card, paper, metal and glass. Think about how you could reuse each one at home. Then, do some research and find out what happens to different materials when they are recycled. Draw and write about what you find out in the spaces below.

My Object	Material	How Could I Reuse it at Home?	What Could It Be Recycled Into?
newspaper	paper	to protect the table when I'm painting	toilet paper
